

Remote Control Racing League

Do you want to race remote control cars?

The 2009 Remote Control Racing League is set to start for the fall and winter of 2009! The league is an opportunity for youth to be involved in a fun, exciting activity while learning responsibility, accountability and being a part of a team.

Come learn about the RCRL, watch RC cars in action and get signed up to join on October 17th from 10 AM to noon and October 20th from 6 to 8 PM.

Youth will be placed on a racing team and supplied with a car and all necessary equipment thanks to the generous support of local sponsors.

Some of the 2008-9 RCRL participants

Events will occur at the indoor arena on the Platte County Fairgrounds from October 20th through December 17th.

Tuesday evenings will be for open practice and car maintenance and Thursday evenings will be race night generally occurring from 6 – 8 PM.

All school age youth are eligible to participant and youth will be placed in appropriate racing divisions depending upon age and ability.

Applications are available on the web site or at the fair or extension offices. Applications are due no later than October 27th.

Participants will be held responsible for their conduct at all times and privileges will be revoked if needed.

A few things that will be different about this year from last year:

- The RCRL will be an organized 4-H club. This means participants will need to complete a 4-H enrollment form and pay \$5 to join 4-H.
- There will be 2 racing sessions each lasting one month. New teams will be formed for each session and youth can participate in either one or both sessions.
- A \$10 participation fee will help cover costs of car repairs. Arrangements can be made for hardship circumstances.

We are also in need of adult leaders to help teams and be overall leaders for the program.
